- PRODUCT SUPPLIER PROFILE – AGPOINT AUSTRALIA -

After more than 140 years in the agricultural manufacturing industry, Agpoint Australia is renowned for the quality and reliability of its products.

Their factory, based in Freeling, SA, specialises in the manufacture of agricultural wear parts, specifically, hot formed and forged

attachments for cultivating and seeding machines such as traditional tillage tools, heavy duty knife points and forged tynes. They have the capacity on site for heat treatment services, steel cutting and the wear enhancement of product through the application of Tungsten Tiles and the AgTuff process.

Their product range includes points and sweeps for combines, cultivators and scarifiers; knife points and seeding points for no till use; spring and following harrows; discs and coulters; u-bolts and plow bolts; furrowers, hoe blades, coil tynes, clamps and wedges; as well as complete tyne assemblies; and slasher blades.
