

## NEWSLETTER No. 34 – 05/08/2013

### WET SEASON? HEADER GOING TO STRUGGLE THROUGH WATERLOGGED PADDOCKS?

New Holland Header owners can harvest in wet conditions without tearing up their fields with New Holland's SmartTrax, now available for CR Series combine models. The rugged, triangular SmartTrax track system replaces the wheels on the combine's front axle. The proven design uses two 36-inch wide rubber tracks, which reduce ground pressure by as much as 60 percent compared to dual drive tires, with only minimal soil disturbance and less soil.

Visit the link below to watch a hill climb comparison between a machine with SmartTrax v Front wheels
